

# Trans-Amazon Expedition

Student Response: April 14, 2007

Name \_\_\_\_\_

## Notes From The Trail: Seasons of Change in the Amazon

1. Name the seasons in the Amazon rainforest. How long does each season last? What season is it there right now?

---

---

---

---

2. Describe one way plants have adapted to life in the rainforest.

---

---

---

---

3. Describe one way people have adapted to life in the rainforest.

---

---

---

---

4. How do rainforests moderate global temperature and weather patterns?

---

---

---

---

## Cultural Connections: The Changing Faces of the Amazon

5. How many countries will the team travel through during the expedition? Name them.

---

---

---

---

6. What are some signs of modernization of indigenous groups?

---

---

---

---

7. How did indigenous groups originally get their food in the rainforest? How has that changed?

---

---

---

---

---

8. What are some negative impacts slash and burn agriculture might have on the ecosystem?

---

---

---

---

---
